Subject Index

Abatement and removal

Development and Evaluation of a Copolymer for Removal of Taste and Odor Causing Compounds from Lake Michigan Water, 552

Estimation of Removal Efficiency for Settling Basins Using Neural Networks and Support Vector Machines, 980

Metals Precipitation from Effluents: Review, 1880

Modeling Elution Histories of Copper and Lead from Contaminated Soil Treated by Poly(amidoamine) Dendrimers, 519

Modeling the Fate of Pharmaceuticals and Personal Care Products in Sewage Treatment Plants, 1864

Optimal Design of a Settling Basin for a Small-Scale Drainage Area., 1171

Optimization of Internal Bypass Ratio for Complete Ammonium and Phosphate Removal in a Dephanox-Type Two-Sludge Denitrification System, 553

Pretreatment by Fenton Oxidation of an Amoxillin Wastewater, 528

Removal and Recovery of Heavy Metals from Simulated Wastewater Using Insoluble Starch Xanthate Process, 1884

Removal of Endosulfan from Water Using Wood Charcoal — Adsorption and Desorption, 502

Removal of Oil from Produced Water by Dissolved Air Flotation, 1867

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments, 9

Absorption

Capillary Force and Water Retention between Two Uneven-Sized Particles, 423

Comparison of Field Measured Soil Absorption Field Loading Rates and Loading Rates Estimated from Soil Morphologic Properties, 1038

Experimental Verification of Capillary Force and Water Retention between Uneven-Sized Spheres, 424

Influence of Hydraulic Loading and Effluent Flux on Surface Surcharging in Soil Absorption Systems, 1040

Modeling Water Table Mounding to Design Cluster and High-Density Wastewater Soil Absorption Systems, 1042

Near-Infrared Spectroscopy for In Situ Monitoring of Geoenvironment, 652

Abutments

Local Scour and Riprap Stability at an Abutment in a Degrading Bed, 930

Three-Dimensional Seismic Response of Humboldt Bay Bridge-Foundation-Ground System, 1556

Acceleration

Delay Analysis under Multiple Baseline Updates, 321

Modeling Driver Behavior and Safety on Freeway Merging Areas, 1680

Numerical Study on the Existence of the Venturi Effect in Passages between Perpendicular Buildings, 483

Access roads

Methodology to Evaluate the Effects of Access Control near Freeway Interchange Areas, 1693

Accident prevention

Design, Development, and Deployment of a Rapid Universal Safety and Health System for Construction, 291

Planning Level Regression Models for Prediction of Crashes on Interchange and Noninterchange Segments of Urban Freeways, 1653

Accidents

The Effects of Leadership in the High Hazard Construction Sector: Injuries and Fatalities an Issue of Leadership and Not Hazard, 1820

Freeway Work-Zone Crash Analysis and Risk Identification Using Multiple and Conditional Logistic Regression, 1663

Importance of Exposure Model in Estimating Impacts When a Water Distribution System is Contaminated, 1767

Premium-Rating Model for Workers' Compensation Insurance in Construction, 324

Study of the Efficiency of Aircraft Safety Barriers in Madeira Airport, 1385

Accounting

Pavement Management Accounting System, 1108

Accreditation

General Education for Civil Engineers: Sustainable Development, 1402

Industrially Sponsored Senior Capstone Experience: Program Implementation and Assessment, 1424

Standards in Civil Engineering Design Education, 1400

Accuracy

Acceptance Curves for the Positional Control of Geographic Databases, 1625

Accuracy of Kinematic Wave and Diffusion Wave Approximations for Flood Routing. I: Steady Analysis, 1080

Accuracy of Kinematic Wave Approximation for Flood Routing. II: Unsteady Analysis, 1081

Analysis of Some Positional Accuracy Assessment Methodologies, 1628

GPS Processing Using Online Services, 1637

Implicit Higher-Order Accuracy Method for Numerical Integration in Dynamic Analysis, 1539

Linearized Stability and Accuracy for Step-by-Step Solutions of Certain Nonlinear Systems, 488

New Line Accuracy Assessment Methodology Using Nonlinear Least-Squares Estimation, 1623

Variability of NSSDA Estimations, 1627

Acid rain

pH and Acid Anion Time Trends in Different Elevation Ranges in the Great Smoky Mountains National Park, 581

Acidic water

Near-Surface Wind-Induced Mixing in a Mine Lake, 926

Suction Removal of Sediment from between Armor Blocks. II: Waves, 921

Acids

Comparison of Extractants for Removal of Lead, Zinc, and Phenanthrene from Manufactured Gas Plant Field Soil, 1890

Impact of Initial pH and Linoleic Acid (C18:2) on Hydrogen Production by a Mesophilic Anaerobic Mixed Culture, 503

Multicriteria Optimization of a Chemical Leaching Process for Sewage Sludge Decontamination, 1881

Removal of Metals in Constructed Wetlands: Review, 1876

Treatment of Cr(VI) in COPR Using Ferrous Sulfate – Sulfuric Acid or Cationic Polysulfides, 771

Acoustic techniques

Estimation of Soil Permeability Using an Acoustic Technique, 776

Flow Structure at Different Stages in a Meander-Bend with Bendway Weirs, 879

Improving Precision in the Reference Velocity of ADCP Measurements Using a Kalman Filter with GPS and Bottom Track, 900

Superload Evaluation of the Bonnet Carré Spillway Bridge, 1379

Activated carbon

Adsorption of Methylene Blue and Phenol by Wood Waste Deroved Actovated Carbon, 530

Characteristics of Ground Granular Activated Carbon for Rapid Small-Scale Column Tests, 516

Effect of Nitrification and GAC Filtration on Copper and Lead Leaching in Home Plumbing Systems, 551

Indoor Air Particulate Filtration onto Activated Carbon Fiber Media, 505

Relative Impact on GAC Usage Rates of Operating Strategies for Treatment of Contaminated Groundwater, 1872

Sorption of Tertiary Butyl Mercaptan to Indoor Materials in Contact with Air or Water, 509

Activated sludge

Bioplastics from Waste Activated Sludge-Batch Process, 1891

Solids Loading Limitations of Rectangular Secondary Clarifiers, 492

Active control

On-Line Learning Failure-Tolerant Neural-Aided Controller for Earthquake Excited Structures, 412

Vibration Controller Design for Confined Masonry Walls by Distributed Genetic Algorithms, 1471

Adaptive systems

Control of Civil Structures Using a Semiactive Stiffness System Based on Variable Amplification, 1563

Reinforcement Learning for Structural Control, 240

Adhesives

Tensile Capacity of GFRP Postinstalled Adhesive Anchors in Concrete, 220

Admixtures

Bond Behavior of Self-Consolidating Concrete with Mineral and Chemical Admixtures, 1334

Effect of Corncob, Wheat Straw, and Plane Leaf Ashes as Mineral Admixtures on Concrete Durability, 1318

Hydration and Mechanical Properties of Magnesia, Pulverized Fuel Ash, and Portland Cement Blends, 1306

Adsorption

Adsorption of Methylene Blue and Phenol by Wood Waste Deroved Actovated Carbon, 530

Characteristics of Ground Granular Activated Carbon for Rapid Small-Scale Column Tests, 516

Effects of Sediment Concentration and Initial Phosphorus Loading on Phosphate Adsorption in the Chongqing Reach of the Yangtze River, 559

Electrokinetic Remediation Modeling Incorporating Geochemical Effects, 616

Evaluation of Biodegradation Potential of Carbon Tetrachloride and Chlorophenols under Acidogenic Condition, 511

Groundwater Quality Evaluation for Productive Uses — The Afram Plains Area, Ghana, 1153

Numerical Modeling of Contaminant Transport through Soils: Case Study, 628

Nutrient Retention in Vegetated and Nonvegetated Bioretention Mesocosms, 1204

Removal of Endosulfan from Water Using Wood Charcoal — Adsorption and Desorption, 502

Sepiolite as an Alternative Liner Material in Municipal Solid Waste Landfills, 712

Trivalent Chromium Ion Adsorption on Various Types of Wastewater Sludge, 1885

Advection

Analytical Solution to the Advective-Dispersive Equation with a Decaying Source and Contaminant, 1092

Eularian-Lagrangian Numerical Scheme for Simulating Advection, Dispersion, and Transient Storage in Streams and a Comparison of Numerical Methods, 604

Mass Conservative Transport Scheme for the Application of the ELCIRC Model to Water Quality Computation, 891

Numerical Modeling of Contaminant Transport through Soils: Case Study, 628

Aeration

Aeration Characteristics of Ski Jump Jets, 784

Air Injection in Water with Different Nozzles, 524

Effects of Sand Depth of Domestic Wastewater Renovation in Intermittently Aerated Leachfield Mesocosms, 1045

Horizontal Injection of Gas – Liquid Mixtures in a Water Tank, 956

Hydraulic Performance of Step Aerator, 789

Low-Strength Wastewater Treatment with Combined Granular Anaerobic and Suspended Aerobic Cultures in Upflow Sludge Blanket Reactors, 525

Aerodynamics

e-Analysis of High-Rise Buildings Subjected to Wind Loads, 1554

Relevance of Eighteen Flutter Derivatives in Wind Response of a Long-Span Cable-Stayed Bridge, 1518

Wind-Induced Internal Pressures in Houses, 1553

Aeroelasticity

Influence of Structural Design on the Aeroelastic Stability of Brancusi's Endless Column, 431

Aerospace engineering
Construction, and Operations in Challenging Environments: Earth & Space 2008, 1978
Coupling among Pitch Motion, Axial Vibration, and Orbital Motion of Large Space Structures, 56
Position Accommodation and Compliance Control for Robotic Excavation, 52
Robust Stationkeeping Control for Libration Point Quasi-Periodic Orbits, 59
Stiffness Matrices of Isoparametric Four-Node Finite Elements by Exact Analytical Integration, 54
Unconventional Approach, 1961

Aesthetics
Simplicity, Scale, and Surprise: Evaluating Structural Form, 80

Afghanistan
Semiprepared Airfield Characteristics at Higher Elevations, 1659

Africa
Educational Partnership to Establish Engineering/Construction Management Graduate Programs in Algeria, 1436

Aggradation
Diffusive Modeling of Aggradation and Degradation in Artificial Channels, 881

Aggregates
Aggregate Morphology Affecting Strength and Permanent Deformation Behavior of Unbound Aggregate Materials, 1335
Comparative Evaluation of Micro-Deval Abrasion Test with Other Toughness/Abrasion Resistance and Soundness Tests, 1303
Durability of Mortars Made with Recycled Fine Aggregates Exposed to Sulfate Solutions, 1272
Dynamic Fracture and Strain Rate Behavior of Aggregates Used in Transportation, 21
Engineering and Environmental Characterization of Municipal Solid Waste Bottom Ash as an Aggregate Substitute Utilized for Asphalt Concrete, 1312
Freeze — Thaw Resistance of Lightweight Concrete and Aggregate at Different Freezing Rates, 1274
Modeling and Analysis of Concrete Slump Using Artificial Neural Networks, 1336
Pavements and Materials: Characterization, Modeling, and Simulation, 1993
Selection of Suitable Aggregation Function for Estimation of Aggregate Pollution Index for River Ganges in India, 570
Strength, Modulus of Elasticity, and Brittleness Index of Rubberized Concrete, 1344
Three-Diimensional Discrete Element Models for Asphalt Mixtures, 486
Water Distribution System Aggregation for Water Quality Analysis, 1750

Aging
Aging of Crushed Glass-Dredged Material Blend Embankments, 759
Comparison between Mechanical Properties of Dam and Sieved Concretes, 1300
Concrete Maturity Method Using Variable Temperature Curing for Normal and High-Strength Concrete. I: Experimental Study, 1348
Discrete Element Modeling of Contact Creep and Aging in Sand, 735
Early-Age Properties of Cement-Based Materials. I: Influence of Cement Fineness, 1321
Laboratory Investigation on Reactivated Residual Strength, 636
Public-Private Partnerships in Infrastructure, 1834
Rubber Concentrations on Rheology of Aged Asphalt Binders, 1289

Agricultural wastes
Development of Watershed Management Strategies for the Chiang-Chun River Basin, Taiwan, 1870

Agriculture
Advanced Oxidation of Diuron by Photo-Fenton Treatment as a Function of Operating Parameters, 605
Analysis of Nitrate Contamination of Gaza Coastal Aquifer, Palestine, 978
Evaluation of a Method for Estimating Irrigated Crop-Evapotranspiration Coefficients from Remotely Sensed Data in Idaho, 1217
Farmland Values under the Influence of Urbanization: Case Study from Turkey, 1704
Hydrologic and Economic Implications of Climate Change for Typical River Basins of the Agric. Midwestern United States, 1739
Soil Salinity Sampling Strategy Using Spatial Modeling Techniques, Remote Sensing, and Field Data, 1222
Survey of Irrigation Methods in California in 2001, 1138
Upland Erosion Modeling in a Semihumid Environment via the Water Erosion Prediction Project Model, 1225
Water Scarcity Effects on Equitable Water Distribution and Land Use in a Major Irrigation Project — Case Study in India, 1129

Air entrainment
Computational and Experimental Study of Surcharged Flow at a 90° Combining Sewer Junction, 844

Air flow
Hydraulic Performance of Step Aerator, 789
Transient Flow Caused by Air Expulsion through an Orifice, 920

Air injection
Air Injection in Water with Different Nozzles, 524

Air pollution
Estimation of Engine Emissions from Commercial Aircraft at a Midsized Turkish Airport, 515
Greenhouse Gas Emission Permit Trading with Different Uncertainties in Emission Sources, 372

Air quality
Estimation of Engine Emissions from Commercial Aircraft at a Midsized Turkish Airport, 515
Reduction of Greenhouse Gas Emission through Applying Hydrogen-Rich Fuel on Industrial Boiler, 1894
Transportation Land Use, Planning, and Air Quality, 2010

Air temperature
Spatial Distribution of the Average Air Temperatures in Italy: Quantitative Analysis, 991

Air traffic
Framework of a Time-Based Simulation Model for the Analysis of Airfield Operations, 1682

Airblast

Laminated Glass Curtain Walls and Laminated Glass Lites Subjected to Low-Level Blast Loading, 1489

Aircraft

Aircraft Icing Detection, Identification, and Reconfigurable Control Based on Kalman Filtering and Neural Networks, 55

Estimation of Engine Emissions from Commercial Aircraft at a Midsized Turkish Airport, 515

Study of the Efficiency of Aircraft Safety Barriers in Madeira Airport, 1385

Airport construction

Minimizing Construction-Related Security Risks during Airport Expansion Projects, 268

Airport runways

Airfield and Highway Pavements: Efficient Pavements Supporting Transportation's Future, 1972

Effect of Granular Subbase Thickness on Airfield Pavement Structural Response, 1302

Study of the Efficiency of Aircraft Safety Barriers in Madeira Airport, 1385

Airport terminals

Aerial Gateway, 1958

Analysis of Level of Service at Airport Departure Lounges: User Perception Approach, 1652

Airports and airfields

Aerial Gateway, 1958

Effect of Granular Subbase Thickness on Airfield Pavement Structural Response, 1302

Estimation of Engine Emissions from Commercial Aircraft at a Midsized Turkish Airport, 515

Framework of a Time-Based Simulation Model for the Analysis of Airfield Operations, 1682

Precise Prediction, 1951

Problem-Solving Base Building under Uncertainty and Ambiguity: Multiple-Case Study on an Airport Expansion Program, 363

Semiprepared Airfield Characteristics at Higher Elevations, 1659

Alabama

Hurricane Katrina Storm Surge Reconnaissance, 665

Alaska

Distribution and Transport of Fecal Bacteria at Spring Thaw in a Rural Alaskan Community, 156

Algorithms

Adaptive Godunov-Based Model for Flood Simulation, 846

Algorithm for Automatic Detection of Topological Changes in Water Distribution Networks, 818

Algorithm for Detection of Change Point in On-Line Monitoring Data, 1097

Ant Colony Optimization for Least-Cost Design and Operation of Pumping Water Distribution Systems, 1729

Application of Artificial Neural Networks to Forecasting Ice Conditions of the Yellow River in the Inner Mongolia Reach, 1054

Application of Centralized and Decentralized Control to Building Structure: Analytical Study, 478

Applying an Ant Colony Optimization Algorithm-Based Multiobjective Approach for Time – Cost Trade-Off, 279

The Battle of the Water Sensor Networks (BWSN): A Design Challenge for Engineers and Algorithms, 1778

Conversion from Discharge to Gate Opening for the Control of Irrigation Canals, 1164

Design Optimization of River Sampling Network Using Genetic Algorithms, 1726

Determination of Optimal Water Resource Management through a Fuzzy Multiobjective Programming and Genetic Algorithm: Case Study in Kinman, Taiwan, 1875

Determination of the Critical Slip Surface Using Artificial Fish Swarms Algorithm, 630

Development of Direct Integration Algorithms for Structural Dynamics Using Discrete Control Theory, 451

Distribution-Free Monte Carlo Simulation: Premise and Refinement, 299

Domain-by-Domain Algorithm for Nonlinear Finite-Element Analysis of Structures, 234

Dynamic Analysis of Nonlinear Frames by Prandtl Neural Networks, 477

Efficient Dual-Frequency Ambiguity Resolution Algorithm for GPS-Based Attitude Determination, 1631

Efficient Multiobjective Storm Sewer Design Using Cellular Automata and Genetic Algorithm Hybrid, 1773

Efficient Sensor Placement Optimization for Securing Large Water Distribution Networks, 1774

Eulerian Structure of Generalized Plasticity: Theoretical and Computational Aspects, 421

Evaluation of a Genetic Algorithm for the Irrigation Scheduling Problem, 1219

Evolutionary Algorithms for the Determination of Critical Depths in Conduits, 1231

Evolutionary Fuzzy Neural Inference System for Decision Making in Geotechnical Engineering, 253

Extended Period Simulation Analysis Considering Valve Shutdowns, 1775

General Realization Algorithm for Modal Identification of Linear Dynamic Systems, 456

Genetic Algorithm for Constrained Optimization Models and Its Application in Groundwater Resources Management, 1724

Implicit Algorithm for Modeling Unsaturated Soil Response in Three-Invariant Stress Space, 39

Improved Self-Adaptive Chaotic Genetic Algorithm for Hydrogeneration Scheduling, 1753

Improvement of the Eigenvalue-Counting Method Based on the Argument Principle, 473

Large-Scale Microscopic Simulation: Toward an Increased Resolution of Transportation Models, 1670

Microscopic Traffic Simulation Model-Based Optimization Approach for the Contraflow Lane Configuration Problem, 1645

Observations on Return Mapping Algorithms for Piecewise Linear Yield Criteria, 38

Optimal Design of a Settling Basin for a Small-Scale Drainage Area., 1171

Optimal Design of Gravity-Fed Looped Water Distribution Networks Considering the Resilience Index, 1742

Optimal Design of Water Networks Using a Modified Genetic Algorithm with Reduction in Search Space, 1733

Optimal Real-Time Operation of Urban Water Distribution Systems Using Reduced Models, 1736

Optimization of Nonlinear Ultrasound Results to Determine Dynamic Properties of Concrete, 1345

Permutation-Based Elitist Genetic Algorithm for Optimization of Large-Sized Resource-Constrained Project Scheduling, 355

Potential Well Locations in In Situ Bioremediation Design Using Neural Network Embedded Monte Carlo Approach, 1893

Search for Critical Slip Surface in Slope Stability Analysis by Spline-Based GA Method, 631

Seismic Protection of a Building Complex Using Variable Friction Damper: Experimental Investigation, 448

Solving Unconfined Groundwater Flow Management Problems with Successive Linear Programming, 1762

Stability Analysis of Direct Integration Algorithms Applied to Nonlinear Structural Dynamics, 455

Stability Limit on Numerical Attenuation Correction Algorithm for Single Polarized Radars, 1093

Three-Dimensional Stability Analysis of Convex Slopes in Plan View, 714

Treating Uncertain Demand Information in Origin — Destination Matrix Estimation with Traffic Counts, 1676

Alignment

Airborne Laser Terrain Mapping for Expediting Highway Projects: Evaluation of Accuracy and Cost, 304

Allowable stress design

ASME BTH-1 Pinned Connection Design Provisions, 1905

Design Category and Service Class Selection for Below-the-Hook Lifting Devices, 1903

Design Factors for Fabricated Steel Below-the-Hook Lifting Devices, 1904

Alluvial fans

Kinematic Wave Theory for Transient Bed Sediment Waves in Alluvial Rivers, 998

Aluminum

End Connection Effects on Vortex Shedding Susceptibility of Welded Aluminum Truss Tubular Web Members, 1383

Quasi-Static Indentation Behavior of Honeycomb Sandwich Materials and Its Application in Impact Simulations, 70

Ammonia

Effect of Bromide and Ammonia on the Formation of Ozonation and Chlorination By-Products, 1874

Kinetic Modeling of Inhibition of Ammonia Oxidation by Nitrite under Low Dissolved Oxygen Conditions, 512

Model Sensitivity Analysis for Biotrickling Filter Treatment of Graywater Simulant and Waste Gas. II, 584

Optimization of Internal Bypass Ratio for Complete Ammonium and Phosphate Removal in a Dephanox-Type Two-Sludge Denitrification System, 553

Small Footprint, Big Promise, 1929

Amplification

Control of Civil Structures Using a Semiactive Stiffness System Based on Variable Amplification, 1563

Anaerobic treatment

Chemical Oxygen Demand and the Mechanism of Excess Sludge Reduction in an Oxic-Settling-Anaerobic Activated Sludge Process, 545

Evaluation of Influent Medium Composition and Concentration in a Batch Reactor for Effective Startup of UASB Reactors, 607

Examination on Process Configurations Incorporating Thermal Treatment for Anaerobic Digestion of Sewage Sludge, 554

Impact of Initial pH and Linoleic Acid (C18:2) on Hydrogen Production by a Mesophilic Anaerobic Mixed Culture, 503

Analytical techniques

Analysis of Impact Response of Composite Laminates under Prestress, 67

Analytic Method to Derive Wetland Stage-Storage Relationships Using GIS Areas, 995

Analytical Prediction of the Seismic Performance of Masonry Infilled Reinforced Concrete Frames Subjected to Near-Field Earthquakes, 1591

Analytical Solution for Tidal Propagation in a Leaky Aquifer Extending Finite Distance under the Sea, 819

Comparing Three Models for Treatment of Stagnant Zones in Riverine Transport, 1232

Comparison of Stormwater Solids Analytical Methods for Performance Evaluation of Manufactured Treatment Devices, 521

Deflection of Partial Ring Segments Subjected to Concentrated Transverse or Radial Inward Forces, 416

Effect of End Tapering on Crack-Induced FRP Debonding from the Concrete Substrate, 164

Groundwater Mounding in the Vadose Zone from On-Site Wastewater Systems: Analytical and Numerical Tools, 1043

Hydraulic Modeling of an Automatic Upstream Water Level Control Gate for Submerged Flow Conditions, 1165

Modeling of IC Debonding of FRP-Strengthened Concrete Flexural Members, 179

Municipal Infrastructure Asset Levels of Service Assessment for Investment Decisions Using Analytic Hierarchy Process, 1112

Physical Theory Hysteretic Model for Steel Braces, 1560

Probabilistic Approach to the Solution of Inverse Problems in Civil Engineering, 254

Seimanylitical Model for Shear Stress Distribution in Simple and Compound Open Channels, 796

Semianalyticl Solutions of Shoreline Response to Time-Varying Wave Conditions, 1803

Web-Based Guide to Transportation Benefit-Cost Analysis, 1671

Anchorages

Bond Tests of Short NSM-FRP and Steel Bar Anchorages, 193

Effects of Gradually Anchored Prestressed CFRP Strips Bonded on Prestressed Concrete Beams, 165

Experimental and Numerical Investigation of the Tensile Behavior of Blind-Bolted T-Stub Connections to Concrete-Filled Circular Columns, 1461

Flexural Strengthening of RC Beams with Prestressed CFRP Sheets: Development of Nonmetallic Anchor Systems, 166

Flexural Strengthening of RC Beams with Prestressed CFRP Sheets: Using Nonmetallic Anchor Systems, 167

Introduction of the Lateral Posttension Method for Prestressed Concrete Bridges, 152

Wedge Anchorage for CFRP Strips, 205

Anchors

Calibration of Reliability-Based Resistance Factors for Flush Drilled Soil Anchors in Taipei Basin, 730

Design Considerations of Carbon Fiber Anchors, 221

Effects of Electrode Configuration on Electrokinetic Stabilization for Caisson Anchors in Calcareous Sand, 640

Numerical Simulation of Vertical Pullout of Plate Anchors in Clay, 682

Penetration Resistance of Offshore Skirted Foundations and Anchors in Dense Sand, 617

Tensile Capacity of GFRP Postinstalled Adhesive Anchors in Concrete, 220

Anisotropy

Asymmetric Dynamic Green's Functions in a Two-Layered Transversely Isotropic Half-Space, 462

Complementary Wave-Based Characterizations of Sedimentation Processes, 612

Continuum Model for In-Plane Anisotropic Inelastic Behavior of Masonry, 1462

Failure Criterion for Cross-Anisotropic Soils, 618

Mechanisms of Small-Strain Shear-Modulus Anisotropy in Soils, 744

Modeling Liquefaction by a Multimechanism Model, 692

Modified Direct Shear Test for Anisotropic Strength of Sand, 726

Seimanylitical Model for Shear Stress Distribution in Simple and Compound Open Channels, 796

Simple Model for Directional Distortional Hardening in Metal Plasticity within Thermodynamics, 458

Approximation methods

Analytical Approximations to Large Hygrothermal Buckling Deformation of a Beam, 1503

Nonlinear Observer-Based Feedback for Open-Channel Level Control, 901

Aquaculture

Investigation of Integrated Management of Large-Scale Irrigation and Aquaculture Systems, 1005

Aquatic habitats

Laboratory Investigation of Mean Drag in a Random Array of Rigid, Emergent Cylinders, 779

Spatial Knowledge-Based Decision Analysis System for Pond Site Assessment, 1719

Aqueducts

Urban Water Management in Ancient Greece: Legacies and Lessons, 1722

Aquifers

Analysis of Nitrate Contamination of Gaza Coastal Aquifer, Palestine, 978

Analytical Solution for Tidal Propagation in a Leaky Aquifer Extending Finite Distance under the Sea, 819

Approximation of *M* Function for Partially Penetrating Wells, 1234

Approximation of Well Function and Identification of Leaky Aquifer Parameters, 1235

Aquifer Parameters from Drawdowns in Large-Diameter Wells: Unsteady Pumping, 1034

Automatic Time Stepping with Global Error Control for Groundwater Flow Models, 1053

Case Study of the Sheahan Wellfield Using $^3H/^3He$ Field Data to Determine Localized Leakage Areas, 1074

Confined Aquifer Parameters Evaluation by Slope-Matching Method, 979

Diagnostic Curve for Confined Aquifer Parameters from Early Drawdowns, 1191

Estimation of the Maximum Consumption of Permanganate by Aquifer Solids Using a Modified Chemical Oxygen, 532

Experimental Verification of Models of Nonlinear Stream Aquifer Transients, 1084

Groundwater Dating and Flow-Model Calibration in the Kern Water Bank, California, 1076

Groundwater Flow from Fractured Layer to Porous-Media Blind Variable Large Diameter Well, 820

Groundwater Travel Times near Spreading Ponds: Inferences from Geochemical and Physical Approaches, 1075

Identifying Head Loss from Early Drawdowns, 1140

Impact of Foliage on the Drag Force of Vegetation in Aquatic Flows, 862

Improved Spring Depletion Solution and Analysis, 1029

Inverse Appilcation of Age-Distribution Modeling Using Environmental Tracers $^3H/^3He$, 1073

Investigations of Pile Foundations in Brownfields, 740

Modeling Water Table Mounding to Design Cluster and High-Density Wastewater Soil Absorption Systems, 1042

Reliability and Remediation Cost of Optimal Remediation Design Considering Uncertainty in Aquifer Parameters, 1763

Saltwater Intrusion Hydrodynamics in a Tidal Aquifer, 1059

Simple Model for Analyzing Transient Pumping from Two Aquifers with Cross Flow, 1154

Simulating the Well Function for Large-Diameter Wells Using MODFLOW, 1177

Simulation of Varada Aquifer System for Sustainable Groundwater Development, 1173

Solving Unconfined Groundwater Flow Management Problems with Successive Linear Programming, 1762

Stream Depletion by Groundwater Pumping in Leaky Aquifers, 968

Stream Depletion for Streams and Aquifers with Finite Widths, 972

Using Environmental Tracers in Modeling Flow in a Complex Shallow Aquifer System, 1077

Arbitration

Construction Claims and Disputes and the Business Culture of Construction in Japan, 1408

Dispute Resolution in the Construction Industry in Ireland: A Move to Adjudication?, 1420

Perspective from the United States: Tensions between "Getting It Done" and "Getting It Right", 1422

Arches

Design of the Fulton Road Bridge Precast Segmental Concrete Arches, 138

Effect of Arching on Active Earth Pressure for Rigid Retaining Walls Considering Translation Mode, 25
Effect of Arching on Uplift Capacity of Pile Groups in Sand, 47
In-Plane Nonlinear Buckling Analysis of Deep Circular Arches Incorporating Transverse Stresses, 422
Out-of-Plane Behavior of URM Arching Walls with Modern Blast Retrofits: Experimental Results and Analytical Model, 1592
Simple Method for the Design of Jet Grouted Umbrellas in Tunneling, 770
Static Load Tests of a Corrugated Steel Plate Arch with Relieving Slab, 127

Architect/engineers
Personality Study of Construction Professionals in the Turkish Construction Industry, 326

Architectural engineering
Structural Concept, Design, and Experimental Verification of a Glass Fiber-Reinforced Polymer Sandwich Roof Structure, 206

Architecture
AEI 2008: Building Integration Solutions, 1971
Comparative Study of the Variables in Construction Project Briefing/Architectural Programming, 276
Formalism for Applying Domain Constraints in Domain-Oriented Schema Matching, 244

Arid lands
Comparison of Runoff Parameterization Schemes with Spatial Heterogeneity across Different Temporal Scales in Semihumid and Semiarid Regions, 1011
Comparison of Simulation and Experimental Data of a Zero Energy Home in an Arid Climate, 380
Groundwater Flow from Fractured Layer to Porous-Media Blind Variable Large Diameter Well, 820
Simulation of Climate Change Impacts on Streamflow in the Bosten Lake Basin Using an Artificial Neural Network Model, 984

Arizona
Normal but Not Ordinary, 1947

Arkansas
Spatial Distributions and Stochastic Parameter Influences on SWAT Flow and Sediment Predictions, 993

Armor units
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight, 1787

Arsenic
Evaluation of a New Field Measurement Method for Arsenic in Drinking Water Samples, 536
Leaching Behaviors of Arsenic from Arsenic-Iron Hydroxide Sludge during TCLP, 568

Artificial intelligence
Application of ANN-Based Response Surface Method to Prediction of Ultimate Strength of Stiffened Panels, 1598
Artificial Intelligence-Based Inductive Models for Prediction and Classification of Fecal Coliform in Surface Waters, 580
Efficient Multiobjective Storm Sewer Design Using Cellular Automata and Genetic Algorithm Hybrid, 1773
Evolutionary Fuzzy Neural Inference System for Decision Making in Geotechnical Engineering, 253
Intelligent Cable Shovel Excavation Modeling and Simulation, 13
Peak Daily Water Demand Forecast Modeling Using Artificial Neural Networks, 1730

Artificial recharge
Groundwater Travel Times near Spreading Ponds: Inferences from Geochemical and Physical Approaches, 1075

ASCE
Official Register 2008, 1991

ASCE Awards & Prizes
Case Histories in Soil and Rock Erosion:Woodrow Wilson Bridge, Brazos River Meander,Normandy Cliffs, and New Orleans Levees, 737

ASCE Publications
2008 Civil Engineering Industry Buyer' Guide -- A Special Supplement to Civil Engineering Magazine, 1970
Assessment of ASCE 7 Standard Wind Load Factors for Tall Building Response Estimates, 1525
Official Register 2008, 1991
Transactions of the American Society of Civil Engineers 2007, 2008

Ashes
Engineering Behavior of a Remolded Expansive Clay Blended with Lime, Calcium Chloride, and Rice-Husk Ash, 1322

Asia
Adjudication: Singapore Perspective, 1421
Strategies Adopted by International Architectural, Engineering, and Construction Firms in Southeast Asia, 1423

Asphalt pavements
Comparative Evaluation of Micro-Deval Abrasion Test with Other Toughness/Abrasion Resistance and Soundness Tests, 1303
Computer Applications in Intelligent Compaction, 250
Dynamic Panel Data Model for Predicting Performance of Asphalt Concrete Overlay, 1650
Effects of Mix Design Variables on Mechanical Properties of Hot Mix Asphalt, 1655
Effects of Temperature and Pressure on Hot Mixed Asphalt Compaction: Field and Laboratory Study, 1313
Engineering and Environmental Characterization of Municipal Solid Waste Bottom Ash as an Aggregate Substitute Utilized for Asphalt Concrete, 1312
Evaluation of Full-Depth Asphalt Pavement Construction Using X-Ray Computed Tomography and Ground Penetrating Radar, 1395
High-Speed, Noncontact Digital Imaging System for Inspection of Hot-Mix Asphalt Pavements, 1667
Laboratory Evaluation of SBS Modified Bituminous Paving Mix, 1301
Linearized Approach for Predicting Thermal Stresses in Asphalt Pavements due to Environmental Conditions, 1279
Optimal Asphalt Pavement Design Considering Cost and Reliability, 1668
Performance Evaluation of Asphalt Concrete Mixes Containing Granular Volcanic Ash, 1351
Top-Down Cracking in Asphalt Pavements: Causes, Effects, and Cures, 1640

Asphalts

Determination of Accurate Creep Compliance and Relaxation Modulus at a Single Temperature for Viscoelastic Solids, 1282

Dynamic Effects on Moisture Transport in Asphalt Concrete, 1

Dynamic Modulus Prediction of HMA Mixtures Based on the Viscoelastic Micromechanical Model, 1325

Effects of Mix Design Variables on Mechanical Properties of Hot Mix Asphalt, 1655

Effects of Temperature and Pressure on Hot Mixed Asphalt Compaction: Field and Laboratory Study, 1313

Engineering and Environmental Characterization of Municipal Solid Waste Bottom Ash as an Aggregate Substitute Utilized for Asphalt Concrete, 1312

Pavements and Materials: Characterization, Modeling, and Simulation, 1993

Rubber Concentrations on Rheology of Aged Asphalt Binders, 1289

Simulation of Fracture Behavior in Asphalt Concrete Using a Heterogeneous Cohesive Zone Discrete Element Model, 1328

Three-Diimensional Discrete Element Models for Asphalt Mixtures, 486

Assessments

Application of a Sustainability Model for Assessing Water Main Replacement Options, 320

Assessing the Damage, 1959

Assessment of Credit Risk in Project Finance, 352

Assessment of Design Formulas for In-Plane FRP Strengthening of Masonry Walls, 225

Assessment of Emergency Room Designs for Protection against an Internal Chemical Threat, 1386

Simultaneous Removal of Nitrogen and Phosphorous from Municipal Wastewater Using Continuous-Flow Integrated Biological Reactor, 510

Asymmetry

Asymmetric Dynamic Green's Functions in a Two-Layered Transversely Isotropic Half-Space, 462

Atmospheric pressure

Stochastic Event-Based Approach to Generate Concurrent Hourly Mean Sea Level Pressure and Wind Sequences for Estuarine Flood Risk Assessment, 1015

Attenuation

Stability Limit on Numerical Attenuation Correction Algorithm for Single Polarized Radars, 1093

Automatic identification systems

RFID + 4D CAD for Progress Management of Structural Steel Works in High-Rise Buildings, 235

Automation

Automated Approach to Negotiations of BOT Contracts with the Consideration of Project Risk, 265

Automated Generation of Construction Plans from Primitive Geometries, 323

Automated Modal Parameter Estimation by Parallel Processing within Wireless Monitoring Systems, 1103

Automated People Mover Standards Part 2: (ANSI/ASCE/T&DI 21.2-08): Vehicles Propulsion and Braking, 1975

Automation of a Center Pivot Using the Temperature-Time-Threshold Method of Irrigation Scheduling, 1161

Earthquake-Actuated Automatic Gas Shutoff Devices (ASCE 25-060, 1980

Feasibility Study of an Automated Tool for Identifying the Implications of Changes in Construction Projects, 277

Sensor-Based Automation of Irrigation on Bermudagrass, during Wet Weather Conditions, 1141

Auto-regressive models

Fitting of Time Series Models to Forecast Streamflow and Groundwater Using Simulated Data from SWAT, 1026

Axial compression

Review of Design Guidelines for FRP Confinement of Reinforced Concrete Columns of Noncircular Cross Sections, 171

Wrinkling and Edge Buckling in Orthotropic Sandwich Beams, 430

Axial forces
Mechanics and Slenderness Limits of Sway-Restricted Reinforced Concrete Columns, 1568
Uniaxial Shear-Flexure Model for Reinforced Concrete Elements, 1588

Axial loads
Dynamic Shear and Axial-Load Failure of Reinforced Concrete Columns, 1558
Effect of Monotonic and Cyclic Bending Deformations on NPS12 Wrinkled Steel Pipeline, 1614
Exact Solution for Buckling of Columns Including Self-Weight, 395
Investigation of the Axial Load Capacity for Lightly Reinforced Wall Piers, 1589
Load Resistance Factor Design of Axially Loaded Pile Based on Load Test Results, 707
Parametric Equations to Predict SCF of Axially Loaded Completely Overlapped Tubular Circular Hollow Section Joints, 1483
Plastic Axial Load and Moment Interaction Curves for Fire-Exposed Steel Sections with Thermal Gradients, 1529

Backfills
Geological and Physical Factors Affecting the Friction Angle of Compacted Sands, 741
Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment, 1795
Service Life of Corroding Galvanized Culverts Embedded in Controlled Low-Strength Materials, 1305
Static Load Tests of a Corrugated Steel Plate Arch with Relieving Slab, 127
Theoretical Equations on Hydraulic Conductivities of Bentonite-Based Buffer and Backfill for Underground Disposal of Radioactive Wastes, 653

Backwater
Backwater Prediction due to the Blockage Caused by a Single, Submerged Spur Dike in an Open Channel, 889

Bacteria
Combining Real-Time Bacteria Models and Uncertainty Analysis for Establishing Health Advisories for Recreational Waters, 1725
Distribution and Transport of Fecal Bacteria at Spring Thaw in a Rural Alaskan Community, 156
Drinking Water Production from Well Water with High Sulfur and Sulfur Bacteria Content, 535
Effects of Energy Source Concentration on Bioleaching of Heavy Metals from Undigested Sewage Sludge by Using Iron-Oxidizing Bacterium, 1883
Effects of Sand Depth of Domestic Wastewater Renovation in Intermittently Aerated Leachfield Mesocosms, 1045
Kinetic Modeling of Inhibition of Ammonia Oxidation by Nitrite under Low Dissolved Oxygen Conditions, 512
Need for Direct Measurements of Coupled Microbiological and Hydrological Processes at Different Scales in Porous Media Systems, 966
Nitrification Modeling in Pilot-Scale Chloraminated Drinking Water Distribution Systems, 574
Prediction of Effluent Quality from Retention Ponds and Constructed Wetlands for Managing Bacterial Stressors in Storm-Wate Runoff, 1199
Sequential Inactivation of *Bacillus Subtilis* Spores with Ultraviolet Radiation and Iodine, 550
Subsurface Mobility of Organo — Cr(III) Complexes Formed during Biological Reduction of Cr(VI), 500

Ballast
Behavior of Railroad Ballast under Monotonic and Cyclic Loading, 637
Response of Multilayer Foundation System beneath Railway Track under Cyclic Loading, 748

Balloons
Measurement of Pavement Surface Reflectance for a Balloon Lighting System, 1685

Banding
Characterization of Cemented Sand by Experimental and Numerical Investigations, 696

Bangladesh
"Demand of Participants" or "Supply of Opportunities": Measuring Accessibility of Activity Places Based on Time Geographic Approach, 1714

Barriers
Comparison of Field Data and Water-Balance Predictions for a Capillary Barrier Cover, 651
Estimation of Maximum Liquid Depth in Layered Drainage Blankets over Landfill Barriers, 498
Improving Seawater Barrier Operation with Simulation Optimization in Southern California, 1735
Model Tests on Discontinuities in Subsurface Barrier Installed by the Vibrating Beam Method, 657
Optimizing the Wind Uplift Resistance of Mechanically Attached Roof Systems, 84
Parapet Strength and Contribution to Live-Load Response for Superload Passages, 95
Study of the Efficiency of Aircraft Safety Barriers in Madeira Airport, 1385
Thickness of Compacted Natural Clay Barriers in MSW Landfills, 1871
Use of Polymer/Organoclay Nanocomposite Surface Treatment as Water/Ion Barrier for Concrete, 1319

Bars
Bond Tests of Short NSM-FRP and Steel Bar Anchorages, 193
Performance of Dowel Bar Retrofit Projects in Texas, 1369

Base course
Fiber-Reinforced Fly Ash Subbases in Rural Roads, 1660

Base flow
Base-Flow Separation in the Source Region of the Yellow River, 1024
Watershed Physical and Hydrological Effects on Baseflow Separation, 1070

Base isolation
Base Isolation for Seismic Retrofitting of Structures, 1918
Experimental Investigations on the Seismic Response of a Base-Isolated Reinforced Concrete Frame Model, 1382
Model for the Force — Displacement Relationship of Wire Rope Springs, 49
Nonlinear Model-Based System Identification of Lead — Rubber Bearings, 1473
Problems with Rayleigh Damping in Base-Isolated Buildings, 1611

Basins

Comparison of Runoff Parameterization Schemes with Spatial Heterogeneity across Different Temporal Scales in Semihumid and Semiarid Regions, 1011

Development of Simplified Solutions for Modeling Recession in Basins, 1166

Forecasting Spring Reservoir Inflows in Churchill Falls Basin in Québec, Canada, 1013

Probable Flood Predictions in Ungauged Coastal Basins of El Salvador, 1001

Status of the Lower Sacramento Valley Flood-Control System within the Context of Its Natural Geomorphic Setting, 1853

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin, 1780

Bathymetry

Analytic Method to Derive Wetland Stage-Storage Relationships Using GIS Areas, 995

Well-Balanced Scheme between Flux and Source Terms for Computation of Shallow-Water Equations over Irregular Bathymetry, 413

Bayesian analysis

Bayesian Belief Network to Assess Carbonation-Induced Corrosion in Reinforced Concrete, 1346

Bayesian Learning Using Automatic Relevance Determination Prior with an Application to Earthquake Early Warning, 482

Bayesian Probabilistic Inference for Nonparametric Damage Detection of Structures, 466

Coupled Semivariogram Uncertainty of Hydrogeological and Geophysical Data on Capture Zone Uncertainty Analysis, 1065

Empirical and Analytical Investigation of Traffic Flow Regimes and Transitions in Signalized Arterials, 1694

Probabilistic Seismic Demand Models and Fragility Estimates for Reinforced Concrete Bridges with Two-Column Bents, 435

Reliability Analysis and Updating of Excavation-Induced Ground Settlement for Building Serviceability Assessment, 738

Stochastic Interpolation of Spatial Random Fields by BF/MCF-ISM, 404

Bays

Case Study for a Cohesive Sediment Transport Model for Matagorda Bay, Texas, with Coupled ADCIRC 2D-Transport and SWAN Wave Models, 806

Case Study of the Sheahan Wellfield Using $^3H/^3He$ Field Data to Determine Localized Leakage Areas, 1074

Estuarine and Coastal Modeling, 1981

Beach erosion

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study, 1810

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches, 1799

Beach nourishment

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale, 1782

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches, 1799

Solutions to Coastal Disasters 2008, 2001

Beaches

Case Study of a Marine Filter Curtain System for Coliform Reduction at a Public Beach, 497

Long-Term Equilibrium Beach Profile Based on Maximum Information Entropy Concept, 1793

Surf Similarity and Solitary Wave Runup, 1797

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes, 1788

Beam columns

3D Solid FInite-Element Analysis of Cyclically Loaded RC Structures Allowing Embedded Reinforcement Slippage, 1506

Behavior of Steel Beam-to-Column Joints at Elevated Temperature: Experimental Investigation, 1513

Bidirecitonal Cyclic Loading Experiment on a 3D Beam — Column Joint Designed for Damage Avoidance, 1607

Column Web Stiffening of Steel Beam-to-Column Joints Subjected to Seismic Actions, 1493

Cyclic Behavior of Steel Wide-Flange Columns Subjected to Large Drift, 1571

Finite Elements on Generalized Elastic Foundation in Timoshenko Beam Therapy, 461

New Connection System for Confined Concrete Columns and Beams. I: Experimental Study, 1612

New Connection System for Confined Concrete Columns and Beams. II: Theoretical Modeling, 1613

Plastic Axial Load and Moment Interaction Curves for Fire-Exposed Steel Sections with Thermal Gradients, 1529

Seismic Rehabilitation of Reinforced Concrete Frame Interior Beam-Column Joints with FRP Composites, 204

Software Patterns for Nonlinear Beam-Column Models, 1499

Structural Stainless Steel Design: Resistance Based on Deformation Capacity, 1482

Beams

Analytical Approximations to Large Hygrothermal Buckling Deformation of a Beam, 1503

Are Deicing Salts Necessary to Promote Scaling in Concrete?, 444

Beam Bending Solutions Based on Nonlocal Timoshenko Beam Theory, 433

Behavior of Short and Deep Beams Made of Concrete-Filled Fiber-Reinforced Polymer Tubes, 173

Bending Strength of Timber Beams Rehabilitated with Reinforced Epoxy Mortar Plates, 1520

Closed-Form Solutions for Vibrations of Nearly Vertical Strings and Beams by Means of Asymptotic Methods, 487

Cracking Characteristics of RC Beams Strengthened with FRP System, 211

Explicit Inelastic Stiffness for Beam Elements with Uniform and Nonuniform Cross Sections, 1504

Fatigue Behavior of Composite-Reinforced Glulam Bridge Girders, 110

Fatigue Behavior of Externally Strengthened Concrete Beams with Fiber-Reinforced Polymers: State of the Art, 186

Field Investigation of a Sandwich Plate System Bridge Deck, 1384

Flexural Strengthening of RC Beams with Prestressed CFRP Sheets: Development of Nonmetallic Anchor Systems, 166

Investigation of Damaged 12-Year-Old Prestressed Concrete Box Beams, 105
Multicrack Detection on Semirigidly Connected Beams Utilizing Dynamic Data, 392
Performance of FRP-Strengthened RC Beams with Different Concrete Surface Profiles, 223
Shear Diaphragm Bracing of Beams. I: Stiffness and Sterngth Behavior, 1476
Shear Diaphragm Bracing of Beams. II: Design Requirements, 1477
Studies on a Large-Span Beam String Pipeline Crossing, 1599
Two-Dimensional Grid Strut-Tie Model Approach for Structural Concrete, 1559
Uniaxial Shear-Flexure Model for Reinforced Concrete Elements, 1588

Explicit Inelastic Stiffness for Beam Elements with Uniform and Nonuniform Cross Sections, 1504

Flooding Probability-Based Optimal Design of Trapezoidal Open Channel Using Freeboard as a Design Variable, 1175

Most Hydraulically Efficieint Standard Lined Canal Sections, 1184

Simplified Design of Hydraulically Efficient Power-Law Channels with Freeboard, 1172

Structural Stainless Steel Design: Resistance Based on Deformation Capacity, 1482

Crossflow

CFD For Simulation of Crosswind on the Efficiency of High Momentum Jet Turbulent Combustion Flames, 556

Crossings

Studies on a Large-Span Beam String Pipeline Crossing, 1599

Crude oil

Structural Dynamics and a Virtual Prototype Simulator of the HAB System for Oil Sands Production, 377

Crushing

Influence of Mineral Composition on the Simple Shear Response of Sands: Experimental Study, 774

Culverts

Effect of Wheel Live Load on Shear Behavior of Precast Reinforced Concrete Box Culverts, 100

Entrance Loss Coefficients and Inlet Control Head – Discharge Relationships for Buried-Invert Culverts, 1229

Hydraulics of Multibarrel Culverts under Inlet Control, 1190

In-Situ Load Testing of Corrugated Steel Pipe-Arch Culverts, 1378

Investigation of Flow Upstream of Orifices, 785

Measured Field Performance and Computer Analysis of Large-Diameter Multiplate Steel Pipe Culvert Installed in Ohio, 1393

Quantifying Culvert Exit Loss, 1159

Service Life of Corroding Galvanized Culverts Embedded in Controlled Low-Strength Materials, 1305

Shear Behavior and Mode of Failure for ASTM C1433 Precast Box Culverts, 124

Curing

Accelerated Curing of Silica-Fume Concrete, 1324

Concrete Maturity Method Using Variable Temperature Curing for Normal and High-Strength Concrete. I: Experimental Study, 1348

Concrete Maturity Method Using Variable Temperature Curing for Normal-Strength Concrete Mixes. II: Theoretical Study, 1349

Currents

2D Modeling of Heterogeneous Dispersion in Meandering Channels, 795

Numerical Modeling of Local Scour below a Piggyback Pipeline in Currents, 925

Curricula

Changing the Status Quo in Environmental Engineering Education in Response to Emerging Markets, 1416

General Education for Civil Engineers: Sustainable Development, 1402

Industrially Sponsored Senior Capstone Experience: Program Implementation and Assessment, 1424

Introducing Smart Structures Technology into Civil Engineering Curriculum: Education Development at Lehigh University, 1398

Problem-Based Learning in Structural Engineering Education, 1433

Teaching Engineering Surveying in a Civil Engineering Program: Curriculum, Pedagogy, and Assessment, 1412

Curtain walls

Laminated Glass Curtain Walls and Laminated Glass Lites Subjected to Low-Level Blast Loading, 1489

Curvature

Analysis of the Flexural Behavior of Partially Bonded FRP Strengthened Concrete Beams, 198

Efficient Method for Estimating Globally Optimal Simple Vertical Curves, 1626

Evaluation of Live-Load Lateral Flange Bending Distribution for a Horizontally Curved I-Girder Bridge, 141

Full-Scale Test and Analysis of a Curved Steel-Box Girder Bridge, 140

Nonlinear Analysis of Space Trusses Using Modified Normal Flow Algorithm, 1541

Redistribution of Velocity and Bed-Shear Stress in Straight and Curved Open Channels by Means of a Bubble Screen: Laboratory Experiments, 794

Successful Launch, 1953

Curved beams

Predicting Strength of Wood I-Joist with a Circular Web Hole, 1561

Cyclic loads

3D Solid FInite-Element Analysis of Cyclically Loaded RC Structures Allowing Embedded Reinforcement Slippage, 1506

Behavior of Fully Grouted Reinforced Concrete Masonry Shear Walls Failing in Flexure: Experimental Results, 1609

Bidirecitonal Cyclic Loading Experiment on a 3D Beam — Column Joint Designed for Damage Avoidance, 1607

Cast Steel Connectors for Circular Hollow Section Braces under Inelastic Cyclic Loading, 1479

Cyclic Behavior of Steel Wide-Flange Columns Subjected to Large Drift, 1571

Design of Foundations on Sensitive Champlain Clay Subjected to Cyclic Loading, 690

Determination of Accurate Creep Compliance and Relaxation Modulus at a Single Temperature for Viscoelastic Solids, 1282

Experimental Behavior of Concrete Joint Interfaces under Reversed Cyclic Loading, 1590

Experimental In-Plane Strength Investigation of Reinforced Concrete Masonry Walls with Opensings, 1517

Fiber-Element Model fo Posttensioned Hollow Block Masonry Shear Walls under Reversed Cyclic Lateral Loading, 1551

Gusset Plate Connections to Circular Hollow Section Braces under Inelastic Cyclic Loading, 1564

Influence of Repeated and Sustained Loading on the Performance of Layered Wood — Concrete Composite Beams, 1485

Physical Theory Hysteretic Model for Steel Braces, 1560

Pore Pressure Generation Models for Sands and Silty Soils Subjected to Cyclic Loading, 742

Response of Multilayer Foundation System beneath Railway Track under Cyclic Loading, 748

Seismic Behavior of RC Columns with Bond-Critical Regions: Criteria for Bond Strengthening Using External FRP Jackets, 170

Strengthening of Reinforced Concrete Bridge Decks Using Carbon Fiber-Reinforced Polymer Composite Materials, 136

Volumetric Strains of Clean Sands Subject to Cyclic Loads, 704

Cyclic tests

Behavior of Railroad Ballast under Monotonic and Cyclic Loading, 637

Correlation between Cyclic Resistance and Shear-Wave Velocity for Providence Silts, 611

Ductility and Energy Dissipation Capacity of Shear-Dominated Steel Plate Walls, 1584

Estimation of Cumulative Deformation Capacity of Buckling Restrained Braces, 1523

Initial Shear Modulus of Remolded Sand-Clay Mixtures, 693

Strain-Dependent Dynamic Properties of Remolded Sand-Clay Mixtures, 694

Testing of Full-Scale Two-Story Steel Plate Shear Wall with Reduced Beam Section Connections and Composite Floors, 1478

Cylinders

Assessing the Efficiency of CFRP Discrete Confinement Systems for Concrete Cylinders, 176

Behavior of Cylindrical Steel Sheels Supported on Local Brackets, 1565

Characteristics of Steady Horseshoe Vortex System near Junction of Square Cylinder and Base Plate, 403

Coherent Structures in the Flow Field around a Circular Cylinder with Scour Hole, 832

Experimental Investigation of Flow Past a Square Cylinder at an Angle of Incidence, 463

Urban Particle Capture in Bioretention Media. I: Laboratory and Field Studies, 540
Video Measurements of Large-Scale Flows in a Laboratory Wave Basin, 1780

Lakes

Coupled Effects of Small-Scale Turbulence and Phytoplankton Biomass in a Small Stratified Lake, 600
Daily Runoff Simulation by an Integrated Catchment Model in the Middle and Lower Regions of the Changjiang Basin, China, 1058
Inexact Chance-Constrained Linear Programming Model for Optimal Water Pollution Management at the Watershed Scale, 1756
Influence of Wind and Lake Morphometry on the Interaction between Two Rivers Entering a Stratified Lake, 940
Near-Surface Wind-Induced Mixing in a Mine Lake, 926
Simulation of Climate Change Impacts on Streamflow in the Bosten Lake Basin Using an Artificial Neural Network Model, 984
Suction Removal of Sediment from between Armor Blocks. II: Waves, 921
Thermistor Chain Data Assimilation to Improve Hydrodynamic Modeling Skill in Stratified Lakes and Reservoirs, 885

Laminar flow

Formulas for Friction Factor in Transitional Regimes, 914

Laminated wood

Cold-Formed Steel Reinforcement for Improperly Cut Wood Composite I-Joists, 1921
Composite Effect of Bolt-Laminated Sweetgum and Mixed Hardwood Billets, 145

Laminates

Analysis of Impact Response of Composite Laminates under Prestress, 67
Development of Novel Industrial Laminated Planks from Sweetgum Lumber, 96
Efficient Strengthening Technique to Increase the Flexural Resistance of Existing RC Slabs, 177
Failure Model for Rate-Dependent Polymer Matrix Composite Laminates under High-Velocity Impact, 61
Nonlinear Transient Response of Laminated Composite Shells, 479
Peridynamic Analysis of Impact Damage in Composite Laminates, 66
Seismic Behavior of a Full-Scale RC Structure Retrofitted Using GFRP Laminates, 1522
Shear Strengthening of T Cross Section Reinforced Concrete Beams by Near-Surface Mounted Technique, 191

Land development

Farmland Values under the Influence of Urbanization: Case Study from Turkey, 1704
Livin' Large with Levees: Lessons Learned and Lost, 1857
Residential Land Development Practices: A Textbook on Developing Land into Finished Lots, 1998
Visioning versus Modeling: Analyzing the Land-Use-Transportation Futures of Urban Regions, 1707

Land management

Spatial Model of Forest Management Strategies and Outcomes in the Wildland — Urban Interface, 1862

Land surveys

Hybrid State Plane Coordinate System for Transforming a Citywide Survey Control Network to Surface Values: Case Study for Frisco, Texas, 1636
Unified Direct Method for Land Subdivision: Circular Sides Permitted, 1629

Land usage

ANN-Based Soil Moisture Retrieval over Bare and Vegetated Areas Using ERS-2 SAR Data, 1016
Surface- and Air-Temperature Studies in Relation to Land Use/Land Cover of Nagpur Urban Area Using Landsat 5 TM Data, 1708
Transportation Land Use, Planning, and Air Quality, 2010
Visioning versus Modeling: Analyzing the Land-Use-Transportation Futures of Urban Regions, 1707

Landfills

Aging of HDPE Geomembrane in Three Composite Landfill Liner Configurations, 688
Depletion of Antioxidants from an HDPE Geomembrane in a Composite Liner, 614
Estimation of Maximum Liquid Depth in Layered Drainage Blankets over Landfill Barriers, 498
Gas-Phase Mass Transfer Processes in Landfill Microbiology, 513
GeoCongress 2008: Geotechnics of Waste Management and Remediation (GSP 177), 1986
Hydraulic Conductivity of Geosynthetic Clay Liners Exhumed from Landfill Final Covers, 2
Interactions between Three Tropical Soils and Municipal Solid Waste Landfill Leachate, 642
Leaching Behavior of Metals Released from Cement-Stabilized/Solidified Refinery Oily Sludge by Means of Sequential Toxicity Characteristic Leaching Procedure, 548
Sepiolite as an Alternative Liner Material in Municipal Solid Waste Landfills, 712
Thermal Analysis of Cover Systems in Municipal Solid Waste Landfills, 757
Thickness of Compacted Natural Clay Barriers in MSW Landfills, 1871

Landslides

Analytical Modeling of Landslide-Generated Waves, 1784
Empirical Predictive Models for Earthquake-Induced Sliding Displacements of Slopes, 675
Probabilistic Seismic Hazard Analysis for the Sliding Displacement of Slopes: Scalar and Vector Approaches, 676
Two-Dimensional SPH Simulations of Landslide-Generated Water Waves, 842

Lasers
Using Scanning Lasers to Determine the Thickness of Concrete Pavement, 322

Lateral displacement
Analyzing Liquefaction-Induced Lateral Spreads Using Strength Ratios, 701
Liquefaction-Induced Settlement of Pile Groups in Liquefiable and Laterally Spreading Soils, 753

Lateral forces
Lateral Response Evaluation of Fiber-Reinforced Neoprene Seismic Isolators Utilized in an Unbonded Application, 1596

Lateral loads
Fiber-Element Model fo Posttensioned Hollow Block Masonry Shear Walls under Reversed Cyclic Lateral Loading, 1551
Field Investigation of a Sandwich Plate System Bridge Deck, 1384
Lateral Behavior of Vertical Pile Group Embedded in Stabilized Earth Slope, 699
Lateral-Loading Tests on a Real RC Building Including Masonry Infill Panels with and without FRP Strengthening, 1311
Note on the Interaction Factor for Two Laterally Loaded Piles, 760
Specializing Park's Compressive Membrane Theory, 1527

Lateral pressure
Resistance of Membrane Retrofit Concrete Masonry Walls to Lateral Pressure, 1366

Lateral stability
Experimental Study of Tubular Flange Girders, 1480
Lateral Torsional Buckling Strength of Tubular Flange Girders, 1532

Lateral stress
Interacting Divided Channel Method for Compound Channel Flow, 890

Laws
Adjudication: Singapore Perspective, 1421
Construction Claims and Disputes and the Business Culture of Construction in Japan, 1408
Sedimentation Engineering: Processes, Measurements, Modeling, and Practice, 1999

Layered soils
Application of the Coupled Local Minimizers Method to the Optimization Problem in the Spectral Analysis of Surface Waves Method, 746
Penetration Resistance of Offshore Skirted Foundations and Anchors in Dense Sand, 617

Layered systems
Asymmetric Dynamic Green's Functions in a Two-Layered Transversely Isotropic Half-Space, 462
Estimation of Maximum Liquid Depth in Layered Drainage Blankets over Landfill Barriers, 498

Leaching
Drainage of Ponded Surface by an Array of Ditches, 1227
Effect of Nitrification and GAC Filtration on Copper and Lead Leaching in Home Plumbing Systems, 551
Enhancing Metal Removal by Coaddition of Fe^{2+} and S^0 as Substrates of *Acidithiobacillus Ferrooxidans* for Sewage Sludge Bioleaching, 1882
Heavy Metal Fractionation and Leachability Studies on Fresh and Partially Decomposed Municipal Solid Waste, 1879
Leaching Behavior of Metals Released from Cement-Stabilized/Solidified Refinery Oily Sludge by Means of Sequential Toxicity Characteristic Leaching Procedure, 548
Leaching Behaviors of Arsenic from Arsenic-Iron Hydroxide Sludge during TCLP, 568
Multicriteria Optimization of a Chemical Leaching Process for Sewage Sludge Decontamination, 1881
Roofing Materials' Contributions to Storm-Water Runoff Pollution, 1207

Lead
Comparison of Extractants for Removal of Lead, Zinc, and Phenanthrene from Manufactured Gas Plant Field Soil, 1890
Effect of Nitrification and GAC Filtration on Copper and Lead Leaching in Home Plumbing Systems, 551
Evaluation of Chemical Treatments for a Mixed Contaminant Soil, 575

Leadership
Becoming Leaders: A Practical Handbook for Women in Engineering, Science, and Technology, 1976
Developing Construction Professionals of the 21st Century: Renewed Vision for Leadership, 1426
The Effects of Leadership in the High Hazard Construction Sector: Injuries and Fatalities an Issue of Leadership and Not Hazard, 1820
Infrastructure Renewal: The Need for Political Leadership, 1841
Leadership Development and Succession Planning, 1821
Leadership, Management, and Political Decisions: The Chicago Transit Authority, 1838
Leadership versus Management: How They Are Different, and Why, 1819
Macroethics and Engineering Leadership, 1840

Leakage
Address-Oriented Impedance Matrix Method for Generic Calibration of Heterogeneous Pipe Network Systems, 782
Analytical Solution for Tidal Propagation in a Leaky Aquifer Extending Finite Distance under the Sea, 819
Approximation of Well Function and Identification of Leaky Aquifer Parameters, 1235
Case Study of the Sheahan Wellfield Using $^3H/^3He$ Field Data to Determine Localized Leakage Areas, 1074
Development and Validation of a New Field Measurement Technique for Estimating the Local and Total Air Duct Leakage in Residential Buildings, 378
Inverse Appilcation of Age-Distribution Modeling Using Environmental Tracers $^3H/^3He$, 1073
Maximization of Water Storage in Backfilled and Lined Channels and Dimples Subject to Evaporation and Leakage, 1139
Pressure-Driven Demand and Leakage Simulation for Water Distribution Networks, 836
Saturated-Unsaturated Flow through Leaky Dams, 749
Stream Depletion by Groundwater Pumping in Leaky Aquifers, 968

Lean construction

Construction Process Reengineering by Integrating Lean Principles and Computer Simulation Techniques, 301

Least squares method

GNSS Differential Positioning by Robust Estimation, 1624

Identification of the Mechanical Subsystem of the NEES-UCSD Shake Table by a Least-Squares Approach, 386

New Line Accuracy Assessment Methodology Using Nonlinear Least-Squares Estimation, 1623

Case Study of the Sheahan Wellfield Using $^{3}H/^{3}He$ Field Data to Determine Localized Leakage Areas, 1074

Geology of the New Orleans Area and the Canal Levee Failures, 660

Halting Hypoxia, 1944

Missouri

Estimation of Earthquake Loss due to Bridge Damage in the St. Louis Metropolitan Area. I: Direct Losses, 1843

Estimation of Earthquake Loss due to Bridge Damage in the St. Louis Metropolitan Area. II: Indirect Losses, 1844

Vapor Adsorption Index for Expansive Soil Classification, 697

Missouri River

Application of a Routing Model for Detecting Channel Flow Changes with Minimal Data, 1022

Evaluating NEXRAD Estimates for the Missouri River Basin: Analysis Using Daily Raingauge Data, 1025

Mixing

Concrete Maturity Method Using Variable Temperature Curing for Normal-Strength Concrete Mixes. II: Theoretical Study, 1349

Destratification by Mechanical Mixers: Mixing Efficiency and Flow Scaling, 961

Effect of Tank Size and Geometry on the Flow Induced by Circular Bubble Plumes and Water Jets, 857

Horizontal Injection of Gas – Liquid Mixtures in a Water Tank, 956

Improved Discharge Configurations for Brine Effluents from Desalination Plants, 788

Methods for Quantifying Lime Incorporation into Dewatered Sludge. I: Bench-Scale Evaluation, 576

Methods for Quantifying Lime Incorporation into Dewatered Sludge. II: Field-Scale Application, 577

Mixing at Cross Junctions in Water Distribution Systems. I: Numerical Study, 1748

Mixing in Water Storage Tanks. I: No Buoyancy Effects, 602

Mixing in Water Storage Tanks. II: With Buoyancy Effects, 603

Solute Mixing Models for Water-Distribution Pipe Networks, 898

Three-Dimensional Numerical Modeling of Initial Mixing of Thermal Discharges at Real-Life Configurations, 896

Mixtures

Accelerated Curing of Silica-Fume Concrete, 1324

Contribution to the Concrete Strength versus Water-Cement Ratio Relationship, 1315

Determination of Accurate Creep Compliance and Relaxation Modulus at a Single Temperature for Viscoelastic Solids, 1282

Dynamic Modulus Prediction of HMA Mixtures Based on the Viscoelastic Micromechanical Model, 1325

Effect of Mixture Composition and Initial Curing Conditions on Scaling Resistance of Ternary (OPC/FA/SF) Concrete, 1341

Effects of Mix Design Variables on Mechanical Properties of Hot Mix Asphalt, 1655

Evaluation of Moisture Damage Mechanisms and Effects of Hydrated Lime in Asphalt Mixtures through Measurements of Mixture Component Properties and Performance Testing, 1340

High-Speed, Noncontact Digital Imaging System for Inspection of Hot-Mix Asphalt Pavements, 1667

Initial Shear Modulus of Remolded Sand-Clay Mixtures, 693

Laboratory Evaluation of SBS Modified Bituminous Paving Mix, 1301

Mechanistic Model for One-Dimensional Consolidation Behavior of Nonsegregating Oil Sands Tailings, 626

Strain-Dependent Dynamic Properties of Remolded Sand-Clay Mixtures, 694

Three-Diimensional Discrete Element Models for Asphalt Mixtures, 486

Modal analysis

Ambient Vibration Analysis with Subspace Methods and Automated Mode Selection: Case Studies, 1543

Ambient Vibration Data Analysis for Structural Identification and Global Condition Assessment, 449

Automated Modal Parameter Estimation by Parallel Processing within Wireless Monitoring Systems, 1103

General Realization Algorithm for Modal Identification of Linear Dynamic Systems, 456

Model Conversion Technique for Structural Dynamic Systems, 1601

Optimization of Nonlinear Ultrasound Results to Determine Dynamic Properties of Concrete, 1345

Structural Damage Detection Using Dynamic Properties Determined from Laboratory and Field Testing, 1377

Vibration Testing at Meazza Stadium: Reliability of Operational Modal Analysis to Health Monitoring Purposes, 1376

Model studies

Adaptive Modal Combination Procedure for Nonlinear Static Analysis of Building Structures, 7

Case Study of the Use of Remotely Sensed Data for Modeling FLood Inundation on the River Severn, U.K., 828

Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight, 1787

Using Bayesian Statistics to Estimate Chlorine Wall Decay Coefficients for Water Supply System, 1731

Model tests

Earth Pressure due to Vibratory Compaction, 648

Fatigue Loading and Temperature Distribution in Single Cell Segmental Box Bridges, 1913

Lateral Behavior of Vertical Pile Group Embedded in Stabilized Earth Slope, 699

Model Tests on Discontinuities in Subsurface Barrier Installed by the Vibrating Beam Method, 657

Penetration Resistance of Offshore Skirted Foundations and Anchors in Dense Sand, 617

Study of the Efficiency of Aircraft Safety Barriers in Madeira Airport, 1385

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations, 1800

Model verification

Control Structure Interaction of Electromagnetic Mass Damper System for Structural Vibration Control, 428

Does the Use of FRP Reinforcement Change the One-Way Shear Behavior of Reinforced Concrete Slabs?, 175

Filling Gaps in Measured Discharge Series with Model-Generated Series, 1063

Verification of Full-Scale Ozone Contactor Inactivation Performance Using Biodosimetry, 526

Water Drainage in Double-Porosity Soils: Experiments and Micro — Macro Modeling, 629

Models

Agent-Based Modeling: Approach for Improving Infrastructure Management, 1118

Bed-Load Transport Equation on Arbitrarily Sloping Beds, 787

Comparing Three Models for Treatment of Stagnant Zones in Riverine Transport, 1232

Development of Simplified Solutions for Modeling Recession in Basins, 1166

Dual-Team Model for International Service Learning in Engineering: Remote Solar Water Pumping in Guatemala, 1413

Empirical Comparison of Statistical Pavement Performance Models, 1106

Full-Scale Testing and Analysis for Blast-Resistant Design, 69

Heterogeneous Approach to Modeling Contractors' Decision-to-Bid Strategies, 341

Modeling Elution Histories of Copper and Lead from Contaminated Soil Treated by Poly(amidoamine) Dendrimers, 519

Models for Predicting Project Performance in China Using Project Management Practices Adopted by Foreign AEC Firms, 362

Nanomechanics Modeling and Simulation of Carbon Nanotubes, 406

Pavements and Materials: Characterization, Modeling, and Simulation, 1993

Premium-Rating Model for Workers' Compensation Insurance in Construction, 324

Pretreatment by Fenton Oxidation of an Amoxillin Wastewater, 528

Pyrolysis Kinetics of Rice Husk in Different Oxygen Concentrations, 527

Simulating Root Water Uptake from a Heterogeneous Vegetative Cover, 1146

Solute Mixing Models for Water-Distribution Pipe Networks, 898

Spatial-Dynamic Modeling of Algal Biomass in Lake Erie: Relative Impacts of Dreissenid Mussels and Nutrient Loads, 544

Transportation Infrastructure Performance Modeling through Seemingly Unrelated Regression Systems, 1105

Urban Particle Caputre in Bioretention Media. II: Theory and Model Development, 541

Virtual Internal Pair-Bond Model for Quasi-Brittle Materials, 469

Moisture

ANN-Based Soil Moisture Retrieval over Bare and Vegetated Areas Using ERS-2 SAR Data, 1016

Dynamic Effects on Moisture Transport in Asphalt Concrete, 1

Evaluation of Full-Depth Asphalt Pavement Construction Using X-Ray Computed Tomography and Ground Penetrating Radar, 1395

Evaluation of Moisture Damage Mechanisms and Effects of Hydrated Lime in Asphalt Mixtures through Measurements of Mixture Component Properties and Performance Testing, 1340

Failure Resistance of the Historic Stone Bridge Structure of Charles Bridge. I: Susceptibility to Nonstress Effects, 1359

Forensic Investigation of Pavement Premature Failure due to Soil Sulfate-Induced Heave, 715

Modeling of Moisture Diffusion in FRP Strengthened Concrete Specimens, 203

Sensor-Based Automation of Irrigation on Bermudagrass, during Wet Weather Conditions, 1141

Use of Polymer/Organoclay Nanocomposite Surface Treatment as Water/Ion Barrier for Concrete, 1319

Moments

Behavior of Steel Beam-to-Column Joints at Elevated Temperature: Experimental Investigation, 1513

Modeling Early-Age Bridge Restraint Moments: Creep, Shrinkage, and Temperature Effects, 133

Monitoring

Algorithm for Detection of Change Point in On-Line Monitoring Data, 1097

Analysis of the Deformation of Embankments on the Qinghai-Tibet Railway, 756

Automated Modal Parameter Estimation by Parallel Processing within Wireless Monitoring Systems, 1103

Automated People Mover Standards -- Part 4 (ANSI/ASCE/T&DI 21.4-08): Security; Emergency Preparedness; System Verification and Documentation; Operation, Maintenance, and Training; Operational Monitoring, 1974

Bridge Reliability Assessment Based on Monitoring, 117

Damage Identification of Shear Connectors with Wavelet Packet Energy: Laboratory Test Study, 1524

Design and Implementation of Scalable Wireless Sensor Network for Structural Monitoring, 1102

Design Optimization of River Sampling Network Using Genetic Algorithms, 1726

Development of New Integrated Tools for Predicting, Monitoring, and Controlling Ground Movements due to Excavations, 1898

Energy Harvesting for Structural Health Monitoring Sensor Networks, 1100

Estimating Compaction of Cohesive Soils from Machine Drive Power, 769

Experimental Study of an Adaptive Extended Kalman Filter for Structural Damage Identification, 1098

GeoCongress 2008: Characterization, Monitoring, and Modeling of GeoSystems (GSP 179), 1984

Hierarchical Localization of Sensor Network for Infrastructure Monitoring, 1095

Identifying Loading and Response Mechanisms from Ten Years of Performance Monitoring of a Tall Building, 1354

Improving System Identification Using Clustering, 259

In Situ Source Treatment of Cr(VI) Using a Fe(II)-Based Reductant Blend: Long-Term Monitoring and Evaluation, 566

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches, 1799

Monitoring and Repair of the Milwaukee City Hall Masonry Tower, 1373

Near-Infrared Spectroscopy for In Situ Monitoring of Geoenvironment, 652

A Professional Engineer Serving in Local Elected Political Office: Personal Observations, 1837

Pollutants

Analytical Solution to the Advective-Dispersive Equation with a Decaying Source and Contaminant, 1092

Can Longitudinal Solute Transport Parameters Be Transferred to Different Flow Rates?, 1020

Experiments on Mass Exchange between Groin Fields and Main Stream in Rivers, 793

Numerical Modeling of Contaminant Transport through Soils: Case Study, 628

Release of Impurities from Melting Snow Made from Treated Municipal Wastewater, 158

Spurious Correlation in the USEPA Rating Curve Method for Estimating Pollutant Loads, 562

Pollution

Electroremediation of Naphthalene in Aqueous Solution Using Alternating and Direct Currents, 494

Flume Test Section Length and Sediment Erodibility, 931

Optimization of Settling Tank Design to Remove Particles and Metals, 591

Polyethylene

Development of a Roofing Material from Polyethylene through the Use of Additives, 1323

Engineer's Liability Considerations in Specifying Corrugated High Density Polyethylene Pipe, 1403

Polymers

Approximation of Nonlinear Unloading Effects in the Strain Rate Dependent Deformation Analysis of Polymer Matrix Materials Utilizing a State Variable Approach, 60

Failure Model for Rate-Dependent Polymer Matrix Composite Laminates under High-Velocity Impact, 61

Measurement of Epoxy Resin Tension, Compression, and Shear Stress — Strain Curves over a Wide Range of Strain Rates Using Small Test Specimens, 64

Simplified Braiding through Integration Points Model for Triaxially Braided Composites, 63

Simplified Hysteretic Finite-Element Model for Wood and Viscoelastic Polymer Connections for the Dynamic Analysis of Shear Walls, 1449

Use of Polymer/Organoclay Nanocomposite Surface Treatment as Water/Ion Barrier for Concrete, 1319

Polynomials

Head-Discharge Equation for Sharp-Crested Polynomial Weir, 1158

Stochastic Solution for Uncertainty Propagation in Nonlinear Shallow-Water Equations, 957

Polyvinyl chloride

Analysis of PVC Pipe-Wall Viscoelasticity during Water Hammer, 919

Ponds

Groundwater Travel Times near Spreading Ponds: Inferences from Geochemical and Physical Approaches, 1075

Investigation of Flow Upstream of Orifices, 785

Reducing Detention Volumes with Improved Outlet Structure, 1228

Spatial Knowledge-Based Decision Analysis System for Pond Site Assessment, 1719

Pools

Temporal Evolution of Plung Pool Scour, 945

Population growth

Normalized Hurricane Damage in the United States: 1900 — 2005, 1846

Pore pressure

Dynamic Effects on Moisture Transport in Asphalt Concrete, 1

Pore Pressure Generation Models for Sands and Silty Soils Subjected to Cyclic Loading, 742

Pore size distribution

Equivalent Stress Equation for Unsaturated Soils. I: Equivalent Stress, 41

Equivalent Stress Equation for Unsaturated Soils. II. Solid-Porous Model, 42

Freeze — Thaw Resistance of Lightweight Concrete and Aggregate at Different Freezing Rates, 1274

Permeable Pavement as a Hydraulic and Filtration Interface for Urban Drainage, 1211

Size and Volume Relationship of Pore for Construction Materials, 1310

Pore water

Postshaking Shear Strain Localization in a Centrifuge Model of a Saturated Sand Slope, 623

Pore water pressure

Design of Foundations on Sensitive Champlain Clay Subjected to Cyclic Loading, 690

Identifying Consolidation Coefficient: Linear Exceess Pore-Water Pressure, 716

Porosity

Analytical Solution for the Chloride Diffusivity of Hardened Cement Paste, 1307

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System, 1794

Microstructural Investigations into the Abrasion Resistance of Fiber-Reinforced Concrete Floors, 1283

Permeable Pavement as a Hydraulic and Filtration Interface for Urban Drainage, 1211

Porous materials

Groundwater Flow from Fractured Layer to Porous-Media Blind Variable Large Diameter Well, 820

Micromechanics Model to Describe Strain Behavior of Concrete in Freezing Process, 1270

Porous media

Computation of the Equivalent Macroscopic Permeability Tensor of Discrete Networks with Heterogeneous Segment Length, 852

Design of Pavements Incorporating Grouted Macadams, 1641

Drainage of Ponded Surface by an Array of Ditches, 1227

Effects of Adsorbed Water Layer in Predicting Saturated Hydraulic Conductivity for Clays with Kozeny — Carman Equation, 678

Groundwater Flow from Fractured Layer to Porous-Media Blind Variable Large Diameter Well, 820

Need for Direct Measurements of Coupled Microbiological and Hydrological Processes at Different Scales in Porous Media Systems, 966

Optimization and Analysis of Advective Travel Times beneath Hydraulic Structures, 906

Study of Flow in a Blanket Clarifier Using Computational Fluid Dynamics, 543

Time-Dependent Dispersivity of Linearly Sorbing Solutes in a Single Fracture with Matrix Diffusion, 992

Unsaturated Capillary Flow within Alkali Activated Slag Concrete, 1329

Water Drainage in Double-Porosity Soils: Experiments and Micro — Macro Modeling, 629

Porous pavements

Permeable Pavement as a Hydraulic and Filtration Interface for Urban Drainage, 1211

Principal Components Regression of Onboard Sound Intensity Levels, 1688

Portland cements

Applying Gray Relational Analysis with Gray Numbers to Qualitative Identification of the Origin of Hydraulic Cement Clinker by Trace Elements, 1326

Collapse of Suspended Portland Cement Plaster Stucco Soffit, 1372

Hydration and Mechanical Properties of Magnesia, Pulverized Fuel Ash, and Portland Cement Blends, 1306

Leaching Behavior of Metals Released from Cement-Stabilized/Solidified Refinery Oily Sludge by Means of Sequential Toxicity Characteristic Leaching Procedure, 548

Reactivity and Function of Magnesium Oxide in Sorel Cement, 1291

Study of the Durability of OPC versus GGBS Concrete on Exposure to Silage Effluent, 1299

Sustainability of Concrete Construction, 1911

Portugal

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations, 1800

Post tensioning

Chloride-Induced Corrosion in Insufficiently Grouted Posttensioned Concrete Beams, 1275

Design of Prestressing Tendons for Strengthening Steel Truss Bridges, 135

Design of the Fulton Road Bridge Precast Segmental Concrete Arches, 138

Fatigue Loading and Temperature Distribution in Single Cell Segmental Box Bridges, 1913

Fiber-Element Model fo Posttensioned Hollow Block Masonry Shear Walls under Reversed Cyclic Lateral Loading, 1551

Flexural Behavior of Nonposttensioned and Posttensioned Concrete-Filled Circular Steel Tubes, 1546

Friction Damped Posttensioned Self-Centering Steel Moment-Resisting Frames, 1610

Introduction of the Lateral Posttension Method for Prestressed Concrete Bridges, 152

Tendon Stress in Unbonded Posttensioned Masonry Walls at Nominal In-Plane Strength, 1536

Postbuckling

Effect of Monotonic and Cyclic Bending Deformations on NPS12 Wrinkled Steel Pipeline, 1614

Shear Strength and Moment-Shear Interaction in Transversely Stiffened Steel I-Girders, 1580

Thermal Effect on the Postbuckling Behavior of an Elastic or Elastoplastic Truss, 418

Post-tensioned concrete

Effects of Duct Types and Emulsifiable Oils on Bond and Friction Losses in Posttensioned Concrete, 101

Seismic Response Evaluation of Posttensioned Precast Concrete Frames with Friction Dampers, 1454

Potential flow

Investigation of Flow Upstream of Orifices, 785

Powerplants

Evaluation of GHG Emission Reduction Potentials of PV System Considering Power Mix Shifts, 374

Fuel Switching in the Electricity Sector under the EU ETS: Review and Prospective, 371

Is a Cap-and Trade System Always Efficient? The Case of New Entrants in the Emissions Trading System of the EU, 370

Precast concrete

Design of the Fulton Road Bridge Precast Segmental Concrete Arches, 138

Effect of Wheel Live Load on Shear Behavior of Precast Reinforced Concrete Box Culverts, 100

Factors Affecting the Use of Precast Concrete Systems in the United States, 281

Formalization of the Flow of Component-Related Information in Precast Concrete Supply Chains, 275

Influence of Haunches on Performance of Precast-Concrete, Short-Span, Skewed Bridges with Integral Abutment Walls, 1362

Seismic Performance of a Transfer Plate Structure, 1604

Seismic Response Evaluation of Posttensioned Precast Concrete Frames with Friction Dampers, 1454

Shear Behavior and Mode of Failure for ASTM C1433 Precast Box Culverts, 124

Precipitation

At-Site Based Evaluation of Rainfall Estimates for Indiana, 985

Case Study of Multiyear Precipitation Variations and the Hydrology of Fort Cobb Reservoir, 970

Evaluating NEXRAD Estimates for the Missouri River Basin: Analysis Using Daily Raingauge Data, 1025

Hourly Disaggregation of Daily Rainfall in Texas Using Measured Hourly Precipitation at Other Locations, 1017

Metals Precipitation from Effluents: Review, 1880

Stochastic Event-Based Approach to Generate Concurrent Hourly Mean Sea Level Pressure and Wind Sequences for Estuarine Flood Risk Assessment, 1015

Predictions

Analytical Prediction of the Seismic Performance of Masonry Infilled Reinforced Concrete Frames Subjected to Near-Field Earthquakes, 1591

Artificial Intelligence-Based Inductive Models for Prediction and Classification of Fecal Coliform in Surface Waters, 580

Continuous Hydrologic Models and Curve Numbers: A Path Forward, 1033

Corrosion Rate Evaluation and Prediction for Piles Based on Long-Term Field Performance, 639

Development of New Integrated Tools for Predicting, Monitoring, and Controlling Ground Movements due to Excavations, 1898

Dynamic Stiffness of Foundations on Inhomogeneous Soils for a Realistic Prediction of Vertical Building Resonance, 638

Effects of Adsorbed Water Layer in Predicting Saturated Hydraulic Conductivity for Clays with Kozeny — Carman Equation, 678

Empirical Comparison of Statistical Pavement Performance Models, 1106

Evaluation of a Predictive Constitutive Model for Sands, 775

Mathematical Prediction of Cylinder Wake during Synchronization, 396

Micromechanics-Based Predictions on the Overall Stress-Strain Relations of Cement-Matrix Composites, 485

Modeling Electrokinetic Nanoparticle Penetration for Permeability Reduction of Hardened Cement Paste, 1343

Noniterative Equivalent Linear Method for Evaluation of Existing Stsructures, 1602

OCR Prediction Using Support Vector Machine Based on Piezocone Data, 686

Predicting Moisture-Dependent Resilient Modulus of Cohesive Soils Using Soil Suction Concept, 1644

Predicting the Erosion Rate of Chemically Treated Soil Using a Process Simulation Apparatus for Internal Crack Erosion, 679

Predictive Modeling of Storm-Water Runoff Quantity and Quality for a Large Urban Watershed, 571

Probabilistic Failure Prediction for Deteriorating Pipelines: Nonparametric Approach, 1356

Probable Flood Predictions in Ungauged Coastal Basins of El Salvador, 1001

Random Plastic Analysis Using a Constitutive Model to Predict the Evolutionary Stress-Related Responses and Time Passages to Failure, 471

Reasoning Mechanism for Construction Nonconformance Root-Cause Analysis, 292

Surface-Based Fractional Transport Predictor: Deterministic or Stochastic, 810

Three-Phase Composite Sphere Model for the Prediction of Chloride Diffusivity of Concrete, 1287

Upland Erosion Modeling in a Semihumid Environment via the Water Erosion Prediction Project Model, 1225

Using Decision Trees for Determining Attribute Weights in a Case-Based Model of Early Cost Prediction, 278

Void Growth Model and Stress Modified Critical Strain Model to Predict Ductile Fracture in Structural Steels, 6

Prefabrication

Crossing Hangzhou Bay, 1956

High-Strength Concrete Columns Reinforced with Prefabricated Cage System, 1516

Preservation

Continuum Model for In-Plane Anisotropic Inelastic Behavior of Masonry, 1462

Horizontal Support of Historic Roof Structures: Design and Structural Efficiency, 79

Pressure

Effect of Seismic Uplift Pressure on the Behavior of Concrete Gravity Dams with a Penetrated Crack, 480

Pressure measurement

Hydraulic Characteristics of Gabion-Stepped Weirs, 888

Valve Design for Extracting Response Functions from Hydraulic Systems Using Pseudorandom Binary Signals, 861

Pressurized flow

Efficient Second-Order Accurate Shock-Capturing Scheme for Modeling One- and Two-Phase Water Hammer Flows, 870

Rapid Flow Startup in Filled Horizontal Pipelines, 871

Prestressed concrete

CFRP Prestressed High-Strength Concrete Prisms Subjected to Direct Tension, 219

Comparison of Prestress Losses for a Prestress Concrete Bridge Made with High-Performance Concrete, 137

Flexural Behavior of an Ultrahigh-Performance Concrete I-Girder, 151

Investigation of Damaged 12-Year-Old Prestressed Concrete Box Beams, 105

Modeling Early-Age Bridge Restraint Moments: Creep, Shrinkage, and Temperature Effects, 133

Modeling of IC Debonding of FRP-Strengthened Concrete Flexural Members, 179

Seismic Performance of a Transfer Plate Structure, 1604

Seismic Response Evaluation of Posttensioned Precast Concrete Frames with Friction Dampers, 1454

Prestressing

Analysis of Impact Response of Composite Laminates under Prestress, 67

Design of Prestressing Tendons for Strengthening Steel Truss Bridges, 135

Ductility and Cracking Behavior of Prestressted Concrete Beams Strengthened with Prestressed CFRP Sheets, 189

Effects of Gradually Anchored Prestressed CFRP Strips Bonded on Prestressed Concrete Beams, 165

Experimental Behavior of Prestressed LVL-Concrete Composite Beams, 1521

Fatigue Strength of Repaired Prestressed Composite Beams, 131

Flexural Strengthening of RC Beams with Prestressed CFRP Sheets: Development of Nonmetallic Anchor Systems, 166

Flexural Strengthening of RC Beams with Prestressed CFRP Sheets: Using Nonmetallic Anchor Systems, 167

Flexural Strengthening of Steel Bridges with High Modulus CFRP Strips, 111

Flexure of Two-Way Slabs Strengthened with Prestressed or Nonprestressed CFRP Sheets, 197

Live Load Distributions on an Impact-Damaged Prestressed Concrete Girder Bridge Repaired Using Prestressed CFRP Sheets, 112

Long-Term Behavior of Prestressed Composite Beams at Service Loads for One Year, 1535

Repair of Bridge Girder Damaged by Impact Loads with Prestressed CFRP Sheets, 91

Wedge Anchorage for CFRP Strips, 205

Pretensioning

Chloride-Induced Corrosion in Insufficiently Grouted Posttensioned Concrete Beams, 1275

Introduction of the Lateral Posttension Method for Prestressed Concrete Bridges, 152

Pricing

Impact of Transportation and Other Jurisdictional-Level Infrastructure and Services on Housing Prices, 1699

Relationship between Organizational Sizes and Contractors' Risk Pricing Behaviors for Weather Risk under Different Project Values and Durations, 331

Private sector

Civil Engineers in Public-Private Partnerships and as Master Planners for Infrastructure Development, 1839

Financial and Operational Performance Assessment of Water/Wastewater Utilities: Comparative Study, 1121

Modeling Boundaries of Concern among Conflicting Stakeholders, 1836

Objectively Assessing Risk in a Complex World, 1835

Privatization

Limits to Water Privatization, 1771

Probability

Advanced Life-Cycle Analysis of Existing Concrete Bridges, 1266

Applicability of Rice's Formula in Stochastic Hydrological Modeling, 1050

Bayesian Probabilistic Inference for Nonparametric Damage Detection of Structures, 466

Condition Assessment of Buried Pipes Using Hierarchical Evidential Reasoning Model, 238

Cost Overrun and Cause in Korean Social Overhead Capital Projects: Roads, Rails, Airports, and Ports, 1702

Dynamic Fragmentation of an Ultrahigh-Strength Concrete during Edge-On Impact Tests, 415

Empirical Predictive Models for Earthquake-Induced Sliding Displacements of Slopes, 675

Estimating the Willingness to Pay for a Flood Control Project in Brazil Using the Contingent Valuation Method, 1700

Parametric Range Estimating of Building Costs Using Regression Models and Bootstrap, 365

Performance-Based Seismic Design of Wood Frame Buildings Using a Probabilistic System Identification Concept, 1465

Probabilistic Approach to the Solution of Inverse Problems in Civil Engineering, 254

Probabilistic Failure Prediction for Deteriorating Pipelines: Nonparametric Approach, 1356

Probabilistic Fatigue Evaluation of Riveted Railway Bridges, 115

Probabilistic Models and Simulation of Irregular Masonry Walls, 460

Probabilistic Seismic Hazard Analysis for the Sliding Displacement of Slopes: Scalar and Vector Approaches, 676

Probabilistic Uncertainty Modeling for Thermomechanical Analysis of Plasterboard Submitted to Fire Load, 1594

Probability and Risk of Slope Failure, 761

Probability of Exceedance Estimates for Scour Depth around Bridge Piers, 624

Reliability Analysis and Updating of Excavation-Induced Ground Settlement for Building Serviceability Assessment, 738

Reliability Evaluation of Earth Slopes, 762

Reliability-Based Analysis and Design of Strip Footings against Bearing Capacity Failure, 689

Reliability-Based Performance Objectives and Probabilistic Robustness in Structural Control Applications, 414

Risk-Based Volume Warrants for Free Right-Turn Lanes on Two-Lane Roadways, 1658

Seismic and Wind Load Considerations for Temporary Structures, 1914

Seismic Fragility and Confidence Bounds for Gravity Load Designed Reinforced Concrete Frames of Varying Height, 1507

Simple Method for the Design of Jet Grouted Umbrellas in Tunneling, 770

Simplified Procedure for Developing Joint Distribution of a_{max} and M_w for Probabilistic Liquefaction Hazard Analysis, 702

Standard Guideline for Fitting Saturated Hydraulic Conductivity Using Probability Density Function (ASCE/EWRI 50-08); Standard Guideline for Calculating the Effective Saturated Hydraulic Conductivity (ASCE/EWRI 51-08), 2003

Stochastic Upscaling for Snow Accumulation and Melt Processes with PDF Approach, 1083

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes, 1788

Uncertainty Analysis for Watershed Modeling Using Generalized Likelihood Uncertainty Estimation with Multiple Calibration Measures, 1728

Uncertainty in Structural Engineering, 1901

Probability density functions

Analytical Derivation of Steady-State Soil Water Probability Density Function Coupled with Simple Stochastic Point Rainfall Model, 1079

Probability distribution

Nonlinear Model-Based System Identification of Lead — Rubber Bearings, 1473

Random Plastic Analysis Using a Constitutive Model to Predict the Evolutionary Stress-Related Responses and Time Passages to Failure, 471

Process control

Project Performance Evaluation Based on Statistical Process Control Techniques, 346

Using Scanning Lasers to Determine the Thickness of Concrete Pavement, 322

Procurement

Achieving Partnering Success through an Incentive Agreement: Lessons Learned from an Underground Railway Extension Project in Hong Kong, 1250

Agent-Based Construction Supply Chain Simulator (CS^2) for Measuring the Value of Real-Time Information Sharing in Construction, 1262

Assessing Infrastructure Project Innovation Potential as a Function of Procurement Mode, 1255

Emergency Contracting Strategies for Federal Projects, 1438

Formalization of the Flow of Component-Related Information in Precast Concrete Supply Chains, 275

Knowledge-Driven ANP Approach to Vendors Evaluation for Sustainable Construction, 357

Participation, Barriers, and Opportunities in PFI: The United Kingdom Experieince, 1251

Partnering the Construction of a Swedish Pharmaceutical Plant: Case Study, 1260

Perceptions of Contractual Risk Allocation in Construction Supply Chains, 1404

Procurement Effects on Coopetition in Client-Contractor Relationships, 274

Relational Contracting and Teambuilding: Assessing Potential Contractual and Noncontractual Incentives, 1242

Productivity

Analysis of Techniques Leading to Radical Reduction in Project Cycle Time, 356

Construction Process Reengineering by Integrating Lean Principles and Computer Simulation Techniques, 301

Critical Issues and Possible Solutions for Motivating Foreign Construction Workers, 1259

Decision Support System for Manufactured Housing Facility Layout, 81

Impact of Shift Work on Labor Productivity for Labor Intensive Contractor, 284

Measuring and Modeling Labor Productivity Using Historical Data, 343

Measuring the Productivity of the Construction Industry in China by Using DEA-Based Malmquist Productivity Indices, 270

Reconciliation of Owner and Contractor Views in Heavy Construction Projects, 1409

Relative Productivity in the AEC Industries in the United States for On-Site and Off-Site Activities, 315

Six Sigma-Based Approach to Improve Performance in Construction Operations, 1239

Slip-Form Application to Concrete Structures, 280

Vision System for Tower Cranes, 296

Professional development

Current State of Highway Safety Education: Safety Course Offerings in Engineering and Public Health, 1399

Developing Construction Professionals of the 21st Century: Renewed Vision for Leadership, 1426

Engineering Professional Growth and Quality and Cultivating the Next Generation, 1818

Job Satisfaction of Women in Construction Trades, 285

Leadership Development and Succession Planning, 1821

Model for Predicting the Performance of Project Maqnagers at the Construction Phase of Mass House Building Projects, 325

Personal Coaching for Business Persons: A Plethora of Choices, 1817

Problem-Based Learning in Structural Engineering Education, 1433

Use of Case Studies in Engineering Education: Assessment of Changes in Cognitive Skills, 1427

Professional practice

Accountability to Prevent Corruption in Construction Projects, 337

Civil Engineering Body of Knowledge for the 21st Century: Preparing the Civil Engineer for the Future, 1977

Navigation Engineering Practice and Ethical Standards, 1990

Standards in Civil Engineering Design Education, 1400

Progressive failure

Effect of Progressive Failure on Measured Shear Strength of Geomembrane/GCL Interface, 650

Macromodel-Based Simulation of Progressive Collapse: Steel Frame Structures, 1548

Macromodel-Based Simulation of Progressive Collapse: RC Frame Structures, 1549

Progressive Collapse and Earthquake Resistance, 1900

Progressive Collapse of the World Trade Center: Simple Analysis, 397

Progressive Collapse Resistance of Hotel San Diego, 1490

System Safety Performance Metrics for Skeletal Structures, 1492

Protective structures

Feasibility of Thermoplastic Composite Jackets for Bridge Impact Protection, 73

Pseudodynamic method

Hybrid Simulation with Improved Operator-Splitting Integration Using Experimental Tangent Stiffness Matrix Estimation, 1616

Seismic Performance Evaluation of a Large-Scale Composite MRF Using Pseudodynamic Testing, 1469

Testing of Full-Scale Two-Story Steel Plate Shear Wall with Reduced Beam Section Connections and Composite Floors, 1478

Public health

Combining Real-Time Bacteria Models and Uncertainty Analysis for Establishing Health Advisories for Recreational Waters, 1725

Current State of Highway Safety Education: Safety Course Offerings in Engineering and Public Health, 1399

Distribution and Transport of Fecal Bacteria at Spring Thaw in a Rural Alaskan Community, 156

Importance of Exposure Model in Estimating Impacts When a Water Distribution System is Contaminated, 1767

New Protocol for the Enumeration of *Salmonella* and *Shigella* from Wastewater, 517

Public participation

Case Studies from the United Kingdom and the United States of Stakeholder Decision Making on Radioactive Waste Management, 1873

Public policy

Single versus Multiple Prime Contracting, 340

Public safety
Correlates of School Disaster Preparedness: Main Effects of Funding and Coordinator Role, 1848

Public transportation
Automated People Mover Standards -- Part 3 (ANSI/ASCE/T&DI 21.3-08): Electrical, Stations, Gateways, 1973
Automated People Mover Standards -- Part 4 (ANSI/ASCE/T&DI 21.4-08): Security; Emergency Preparedness; System Verification and Documentation; Operation, Maintenance, and Training; Operational Monitoring, 1974
Comparing the Performance of Bus Routes after Adjusting for the Environment Using Data Envelopment Analysis, 1649
Leadership, Management, and Political Decisions: The Chicago Transit Authority, 1838
Linking Transportation Planning to Program Implementation, 1706
Using Panel Data Analysis to Estimate DEA Confidence Intervals Adjusted for the Environment, 1664

Publications
Effective Web Dissemination of Construction IT Research Publications, 1411

Pull-out resistance
Bond Tests of Short NSM-FRP and Steel Bar Anchorages, 193
Calibration of Reliability-Based Resistance Factors for Flush Drilled Soil Anchors in Taipei Basin, 730
Effects of Electrode Configuration on Electrokinetic Stabilization for Caisson Anchors in Calcareous Sand, 640
Numerical Simulation of Vertical Pullout of Plate Anchors in Clay, 682
Rapid Pullout Test of Soil Nail, 728
Suggested Empirical Models for Corrosion-Induced Bond Degradation in Reinforced Concrete, 1463
Tensile Capacity of GFRP Postinstalled Adhesive Anchors in Concrete, 220

Pultrusion
Deflection Response of Glass Fiber-Reinforced Pultruded Components in Hot Weather Climates, 196

Pumping stations
Ant Colony Optimization for Least-Cost Design and Operation of Pumping Water Distribution Systems, 1729

Pumping tests
Approximation of Well Function and Identification of Leaky Aquifer Parameters, 1235
Estimating Aquifer Parameters from Early Drawdowns in Large-Diameter Wells, 1176
Identifying Head Loss from Early Drawdowns, 1140

Pumps
Ant Colony Optimization for Optimal Control of Pumps in Water Distribution Networks, 1755
Anticipating Growth, 1957
Aquifer Parameters from Drawdowns in Large-Diameter Wells: Unsteady Pumping, 1034
Confined Aquifer Parameters Evaluation by Slope-Matching Method, 979
Diagnostic Curve for Confined Aquifer Parameters from Early Drawdowns, 1191
